

CAPABILITY STATEMENT

InfraDev.Africa | Solutionists

Who we are

InfraDev.Africa is a strategic infrastructure advisory and delivery-support firm focused on making projects feasible, bankable, and executable in African contexts.

Sectors

- Power systems: transmission & distribution planning, renewables integration
- Decentralised energy: mini-grids, hybrid systems, storage deployment
- Urban infrastructure: mobility, housing enabling works, city services
- Water & sanitation: access systems, program design, delivery monitoring

Core services

- Master planning & investment roadmaps (cities, corridors, SEZs, utilities)
- Pre-feasibility & feasibility studies (technical, financial, ESG)
- PPP & transaction support (structuring, risk allocation, procurement packs)
- Lender & investor due diligence support (data rooms, technical review)

Why InfraDev

- Systems thinking: we treat energy, water, health, logistics and governance as one connected machine.
- Context fluency: African delivery realities, stakeholder dynamics, and procurement constraints.
- Boardroom + field: rigorous documents that still survive real sites and messy data.

How we work

Typical engagement formats:

- Rapid diagnostic (2–4 weeks)
- Feasibility / structuring (6–16 weeks)
- Delivery support / PMO (3–18 months)

Primary geography: DRC with pan-African execution through partnerships.

Address: 15 Avenue du Grand Séminaire, Q/ Nganda, C/Kintámbó, Kinshasa (DRC)

TRACK RECORD & DELIVERABLES

Representative experience of leadership & typical outputs

Experience

Selected leadership experience (prior roles) – used to inform InfraDev delivery quality and standards:

- Power networks planning & advisory across Africa (transmission/distribution, renewables integration).
- Senegal grid stability support (USAID/USEA programme with Mott MacDonald, 2017–2019): technical facilitation, bilingual delivery, data collection and dynamic model support (CYME), and capacity-building recommendations.
- Luanda integrated planning assignments (master planning / infrastructure coordination).
- Ghana gas-to-power strategy support (Genser Energy): commercial and delivery-oriented advisory.
- Company-managed healthcare system transformation (Watu Wetu Health System): multi-phase programme design, governance and performance tracking.

Deliverables

Outputs we produce (examples):

- Feasibility reports (technical, economic, financial model interface, ESG)
- Investment notes and decision memos for boards and DFIs
- PPP / procurement packs: TORs, RFPs, evaluation frameworks, draft risk matrices
- Implementation plans: phased roadmaps, CAPEX/OPEX logic, governance & reporting systems
- Dashboards: progress tracking, KPI trees, action logs, stakeholder maps

Delivery principles

- Evidence-first: assumptions labelled, data gaps logged, decisions traceable.
- Bankability: we write for lenders, not for theatre.
- Localisation: designs adapted to procurement, operations, and skills realities.
- Partner-ready: clear interfaces for OEMs, EPCs, DFIs and public agencies.

Note: InfraDev is part of a broader ecosystem approach under Kumea.Africa (House of Brands governance).
